smt Rapid Health Check

Inventory

SMT Consulting is pleased to offer a **Rapid Health Check** of your **Inventory Situation** at SKU Level.

Inventory – an asset but when overstocked a major liability. Don't let excess inventory effect your abilities to stock and sell fast moving profitable lines.

Understand the true cost of inventory and what the real holding cost and handling costs consists of. Focus on how to use this information.

SMT Consulting has, for over 20 years, assisted companies in optimising inventory. With over 80 years of experience within our consultants' ranks we can help identify inventory issues at a product and SKU level.

Using our proven inventory analytical tool, INSTOC, we can rapidly analyse your inventory, initially at a category or class level and focus attention on dead or slow moving lines.

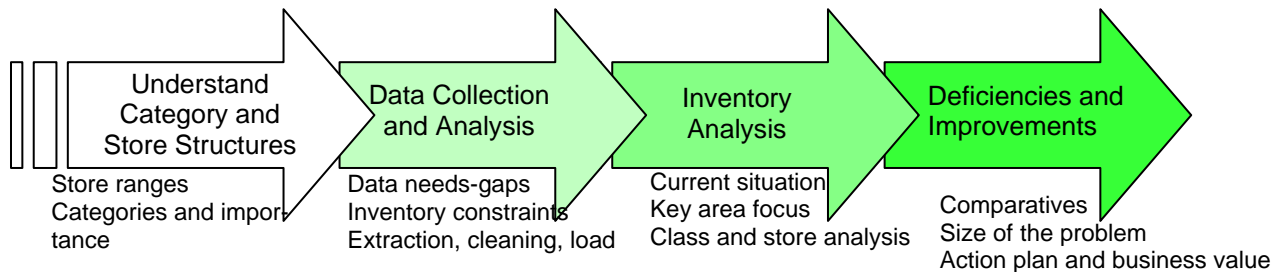

Our 4 phase Rapid Health Check is designed to simply and quickly analyse your process and performance in this important area.

Best Practice Principles

Quick Review

Minimal Disruption

Focused Results

RAPID HEALTH CHECK - INVENTORY				
Phase 1 Category-Store Structura	Discussion with Inventory and Supply Chain 3 hour	Review of Reports		
Phase 2 Data Collection & Analysis	Discussion on Data Availability and Requirements	Cleansing and Other Data Prep Work		
Phase 3 Inventory Analysis	Data Load into Instoc	Simple Accuracy Tests		
Phase 4 Deficiencies & Improvements		Analysis of Inventory and Historical Trends	Forecasts and Modelling	Presentation of Findings
	Day 1-4	Days 5-11	Day 12-14	Day 15

The results will include

- ◆ Inventory Overs and Unders
 - ◇ Current situation
 - ◇ By category-class
 - ◇ By region-store-warehouse
- ◆ Estimated complexity of problem
- ◆ Batch, order and storage constraints
- ◆ Provide a plan for improvement
- ◆ Define the \$ REWARD for improvement

Do you want to:

- Define your inventory problems and quantify rewards
- Define inventory problems into DEAD or SLOW MOVERS
- Focus on several approaches to reducing inventory
- Introduce a dynamic approach to inventory control
